Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Applicant contacted Examiner regarding a potential response after final to obviate the instant rejections of record. Upon review of the rejections of record and the present disclosure, Examiner noted that the evidence of record supported changes in PP2C activity, however the correlation was with respect to restoring a transformed phenotype and not a means to ameliorate cancer. Specifically, it was noted that the art and specification supported that an increase in PP2C activity was associated with the transformation process not a restoration of normal phenotype. It was unclear how this observation, a means to restore transformed activity, provides a nexus to the instantly claimed methodology drawn to restoring a normal phenotype.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
